

How to Re-ink Auto Stamp

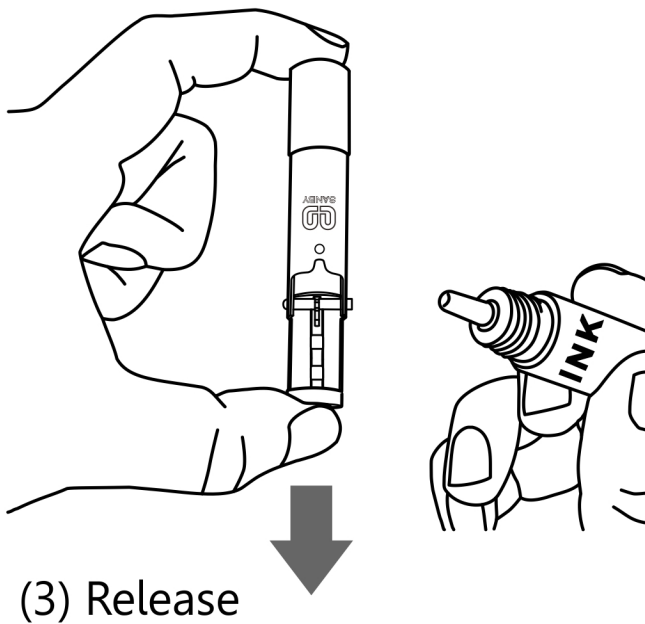

When imprint starts to fade, you can re-ink easily in 3 steps.

Step (1)

Gradually press an end of auto stamp inside until the rubber stamp faces up horizontally.

Step (2)

Drop and apply ink onto the entire area of rubber stamp.

Step (3)

Gradually release the end of auto stamp until the rubber stamp turns to contact an ink pad inside the body. Then ink will be absorbed and kept inside the ink pad for future use.

Repeat step 1 to 3 for two or three times, then check the imprint conditions by stamping on the paper.
